

EFFORTLESS CONTRACT AI + AI ASSIST TEAM

The Pramata Difference

Pramata's AI Assist is a fully integrated team of contract domain experts—lawyers, finance professionals, and data scientists—with experience digitizing nearly 9 million documents. Our team of experts takes the time to learn your business, optimize our solution to your contracts, and ensure ongoing quality.

And where AI alone simply isn't enough—in scenarios like amended terms, third-party paper, and poor quality documents—AI Assist handles any exceptions and data extraction to ensure you have complete visibility across your contracts.

Cleanse AI provides a clean, complete set of digital documents.

Our expert AI Assist Team is always there to:

- ✓ Inspect documents flagged by AI for potential missing signatures, missing pages and duplicate documents.
- ✓ Assess OCR quality of documents and route poor quality documents through a special process.
- ✓ Identify and group documents by templates and set up document splitting and merging rules.

Our expert AI Assist Team is always there to:

- ✓ Establish legal entity hierarchies and CRM account mapping rules and manage exceptions.
- ✓ Review and build document families and order of precedence from documents with a low confidence in AI output.
- ✓ Identify missing Amendments, Master Agreements, and Orders and collaborate with customer teams to resolve them.

Organize AI establishes a normalized, complete set of documents for every relationship.

Our expert AI Assist Team is always there to:

- ✓ Confirm accuracy of extracted key terms and obligations from each unique contract template, including third-party paper templates.
- ✓ Review and extract contract terms and obligations from documents with a low confidence in AI output.
- ✓ Run ongoing quality checks to identify errors and adjust automation technology to account for new clauses and templates.

Extract AI transforms hidden, unstructured data into a structured, usable format.

Our expert AI Assist Team is always there to:

- ✓ Validate output of contract status and renewal date calculations and review exceptions.
- ✓ Configure and maintain customer summaries and order-of-precedence technologies.
- ✓ Adjust Smart Contract Model to add new terms and calibrate AI to handle new, customer-specific scenarios.

Analyze AI continually provides up-to-date data you can rely on with 100% confidence.
